Coherence Therapy

‘Utilizing the Brain’s Process for Dissolving Symptom-Generating Implicit Constructs’

Two exciting new workshops in Central London

Friday 11th and Saturday 12th July 2014

Join workshop presenters Robin Ticic and Tor Wennerberg for a one-day or two-day workshop where you will learn more about the ground breaking principles underpinning Coherence Therapy (www.CoherenceTherapy.org).

Introductory Workshop (July 11th, 2014)

In the one day Introductory Workshop you will come to understand how Coherence Therapy dispels a wide range of problems and symptoms by dissolving their emotional roots. This involves using a guided process for accurately finding the specific emotional implicit constructs and schemas maintaining a symptom followed by a guided process of transformational change that nullifies those schemas, releasing their powerful grip and ending symptom production.

This process of transformational change is corroborated by neuroscience research findings on memory reconsolidation which is currently the only known process for erasing a specific implicit learning.

In this Introductory Workshop participants will learn the steps of methodology of Coherence Therapy

Intermediate Workshop (July 12th, 2014)

This is an intensive skills-building workshop during which participants will have the opportunity to do their own real sessions in small groups and develop their skills in the use of Coherence Therapy. Participants will be coached by Robin and Tor, offering live, in the moment feedback.

In order to attend the Intermediate Workshop participants need to attend the Introductory Workshop on Friday 11th July 2014, AND to have familiarity with and experience of using Coherence Therapy with clients AND to have familiarity with the ‘Coherence Therapy Practice Manual’ or ‘Unlocking the Emotional Brain’ or ‘Depth Oriented Brief Therapy’.

About the Facilitators

Robin Ticic is Director of Training and Development of the Coherence Psychology Institute and co-author of ‘Unlocking the Emotional Brain: Eliminating Symptoms at Their Roots Using Memory Reconsolidation’. She is in private practice near Cologne, Germany, specializing in clinical supervision and training of therapists. She has served as a psychologist for the Psychotraumatology Institute of the University of Cologne, and is author of the parenting guide ‘How to Connect with Your Child’ published in English and German.

Tor Wennerberg is a licenced clinical psychologist in Stockholm, Sweden. He is the author of two books on attachment theory and differentiation theory, published in 2010 and 2013 respectively. Both are widely used in psychotherapy trainings throughout Sweden. A chapter in his most recent book introduced Coherence Therapy for a Swedish professional audience. He is also a regular contributor to the Journal of the Swedish Psychological Association.

DATES: Introductory Workshop - Friday 11th July, 2014 (9am-5pm)
Intermediate Workshop - Saturday 12th July, 2014 (9am-5pm)
